

# Hosted Services

*"Managed Cloud Computing Solutions for Small Business"*

Complement your in-house computer systems with our full-suite of hosted or "cloud" solutions

- ◆ Priced on a monthly basis
- ◆ No contracts required
- ◆ No setup fees on most services
- ◆ Monitored 7/24
- ◆ Includes free technical support
- ◆ 30-day free trials on most services

## Web & (POP) Email Hosting

Our standard packages provide web hosting and POP email services on shared Linux servers. Dedicated Linux and Windows servers are also available. Our servers are hosted in professional data centers with 7x24 technical support and security. Redundant Internet connections, uninterruptible power supplies and backup generators provide over 99.9% uptime.

Our hosting packages include:

- ◆ Up to 40 GB of disk space
- ◆ Up to 100 GB of monthly Internet bandwidth
- ◆ Unlimited email accounts
- ◆ Spam and malware filtering
- ◆ Webmail access to all email accounts
- ◆ Shopping carts & MySQL databases
- ◆ CGI and PHP Scripting

## Hosted Exchange

Provides the full benefit of an Exchange 2007/2010 server without the capital expense and technical overhead associated with an in-house server. Recommended if you:

- ◆ Need more than a simple Internet/POP mail solution
- ◆ Need group collaboration services (meeting and resource scheduling, shared calendars, public folders)
- ◆ Need to access email from multiple locations and devices
- ◆ Need real time calendar, address book and/or task list synchronization with smart phones
- ◆ Have fewer than 20 employees

Features include:

- ◆ Unlimited storage for personal mailboxes
- ◆ Integrated spam & virus protection
- ◆ High availability. 99.99% uptime

Your Network ...  
Our Responsibility

### Web Surfing Security

Uses DNS technology to control which sites your staff may visit on the Internet. Unlike other content filtering systems, this service can be deployed quickly without costly and complex equipment and software.

Features include:

- ◆ Shielding your network from malware and viruses
- ◆ Minimizing legal and compliance issues
- ◆ Improving employee productivity

### Remote Backup

Provides a secure and easy to use solution to protect your data. Highlights include:

- ◆ **Security.** All data is encrypted with military-grade encryption prior to transfer via a secure SSL connection.
- ◆ **Convenience.** Once setup, there is nothing to do. No tapes to change or disks to transport.
- ◆ **Managed.** Acutech monitors backup status daily and takes appropriate action if backups fail for any reason
- ◆ **Versatility.** Backs up virtually all files including SQL, Exchange and open/locked files.
- ◆ **Version Support.** Maintains up to 30 distinct versions of a file. Allows you to restore from the latest copy or revert to a previous version.  
Stores deleted files for up to 30 days.

### Email Spam & Virus Protection

Eliminates up to 99% of unwanted email before it reaches your network. All without costly appliances or complicated software filters. Features include:

- ◆ **Comprehensive email protection.** The filtering system is continually updated 2,000 to 4,000 times per day.
- ◆ **Daily Held Mail Report.** Reports daily to each user and tells them what emails have been blocked. With a single click, a user can have a held email resent to their mailbox
- ◆ **Backup/Disaster Recovery.** If your Exchange server is not accepting email, your incoming email will be held until you are back on-line. No lost emails!

### Email Encryption

Email security solutions use proven encryption technologies to provide strong security for your most sensitive email communications. It is an easy solution to install, manage and use. Key features include:

- ◆ Protection of confidential information and regulatory compliance
- ◆ Integration with Outlook— familiar and easy to use for end users
- ◆ Easy-to-use protection of email traffic to any user — does not require the end user to have any special software installed
